

Decisions: Accessories, Colors, Customization, etc.

Supplies

Identify and label all of the parts

Paint everything one coat

Finish the Floors

Sand everything until the paint is smooth, transparent, and some of the wood is showing through

Option: Add an Electrification Slot to the Base Floor

Test the Assembly to see how things fit and what gets painted

Second-coat everything (the outside)... Everything that gets glued to the house should be fully painted

Build the Housebody up to the Roof

Optional: Start the wiring

Mark, paint, and attach the Roofs (but do not glue the Rear Roof)

Optional: Attic wiring

Install the Dividers

Optional: Finish the wiring

Assemble and finish painting everything else

Finish the Attic - attach the Rear Roof

Finish the outside

Finish the inside
